PROFESSIONAL SUMMARY

Hands-on technical leader with experience across WordPress development, DevOps, web infrastructure, and internal business systems. Progressed from WordPress Developer to DevOps Engineer and Chief Technology Officer within a lean startup, combining business-to-technical translation with hands-on development, deployment, and troubleshooting. Experienced with Linux/VPS environments, GitHub Actions, WordPress/WooCommerce, PHP, JavaScript, MySQL, and cross-functional delivery with SEO, marketing, and design teams.

TECHNICAL SKILLS

Infrastructure & Deployment: Linux, VPS/web hosting, SSH/SFTP, DNS, MySQL, website/database migrations, server monitoring, RDP, basic Cloudflare, hosted Redis exposure

CI/CD & Version Control: Git, GitHub, GitHub Actions, basic CI/CD workflows, development/staging/production workflows, deployment troubleshooting

WordPress & Web: WordPress, WooCommerce, custom themes, child themes, custom plugins, Gutenberg blocks, performance and security troubleshooting

Development: PHP, JavaScript, HTML, CSS, SQL, Laravel, Vue.js, REST APIs, React Native (basic), authentication and CRUD applications

PROFESSIONAL EXPERIENCE

Vite SEO Digital Advertising OPC

Makati City, Philippines | August 2025 - Present

Chief Technology Officer / Hands-on Technical Lead | March 2026 - Present

- Lead technical planning and day-to-day engineering delivery in a lean startup while remaining hands-on in development, troubleshooting, deployment, and implementation.
- Translate business and operational needs into practical technical solutions and help prioritize work across websites, internal systems, infrastructure, and product-related technology.
- Guide a small development team that includes a developer and development interns; assign work, review implementations, support debugging, and help resolve critical technical issues.
- Contribute to the development and evolution of HRIS, CRM, project management, accounting, and NFC-enabled systems, alongside informational and eCommerce websites.
- Collaborate with SEO, marketing, and design teams and provide technical input for cross-functional initiatives and internal process improvements.

DevOps Engineer | January 2026 - March 2026

- Took ownership of website and application deployments and maintained basic CI/CD workflows using GitHub Actions.
- Managed Linux/VPS hosting environments, domains and DNS, SSH/SFTP access, MySQL databases, website migrations, and production troubleshooting.
- Monitored server resources, supported remote-access/RDP environments, and handled routine deployment, service, and configuration issues with an emphasis on reliability.
- Continued hands-on development across WordPress and internal web systems while expanding responsibility for infrastructure and release workflows.

WordPress Developer | August 2025 - December 2025

- Developed and maintained responsive informational and eCommerce websites using WordPress and WooCommerce.
- Built and customized child themes, custom themes, plugins, Gutenberg blocks, and PHP/JavaScript functionality based on project requirements.
- Handled website setup, migrations, performance troubleshooting, and hosting/domain configuration while collaborating with SEO, marketing, and design teams.

SELECTED TECHNICAL WORK

- Business Systems: Contribute to internal HRIS, CRM, project management, and accounting systems used to support business operations and workflow management.
- NFC-enabled Solutions: Contribute to software workflows supporting an NFC-based physical product and related business use cases.
- WordPress & eCommerce Delivery: Build custom WordPress functionality, WooCommerce experiences, reusable blocks/plugins, and deployment workflows for client and company websites.
- Infrastructure & Migration: Support production website migrations, database movement, DNS/domain configuration, VPS hosting, deployment troubleshooting, and server operations.

EARLIER EXPERIENCE

Junior Web Developer Intern

Circuit Solutions, Inc. - Ortigas Center, Pasig City | June 2024 - September 2024

- Built a CRUD web application using HTML, CSS, JavaScript, and PHP, later migrating the application to Vue 2, Laravel 9, and Vuetify.
- Developed a CSV upload workflow for employee attendance and overtime processing, including frontend validation and backend handling.
- Contributed to a facial-recognition and document-capture solution and gained practical experience with REST APIs, MySQL, Git, bug fixing, and UX improvements.

EDUCATION

Bachelor of Science in Information Systems (BSIS)

ACLC College of Taytay | Graduated June 2025

- Summa Cum Laude - GWA 1.19
- Pasig City Scholar

LEADERSHIP & WORKING STYLE

Technical leadership: Business-to-technical translation, task prioritization, code review, developer/intern guidance, technical decision support, and critical-issue ownership.

Cross-functional collaboration: Works closely with SEO, marketing, design, and management teams to align technical delivery with business needs.

Development approach: Hands-on, tool-assisted engineering workflow focused on solution design, implementation, debugging, integration, deployment, and continuous improvement.
